The General Director of SBM attended and spoke at the Conference on connecting banks and businesses in Binh Duong province in 2023.

As for businesses that no longer have orders, what do they need to borrow? But businesses they don't borrow, banks can't grow. Hopefully from the second quarter of 2023, both businesses and banks will overcome difficulties. On the morning of March 22, 2023, at the Convention and Exhibition Center of Binh Duong province, SBM's General Director Mr. TRAN THANH TRONG attended and spoke at the Conference to connect businesses and banks in Binh Duong province in 2023. This morning, at the Conference connecting banks and businesses in Binh Duong province, according to Mr. Trong, the production and business situation of enterprises in the first quarter of 2023 deteriorated rapidly. Therefore, the synergy and companionship of the banking system is needed. Any business with good contracts and orders, banks should evaluate and lend without requiring collateral with existing assets. Only then will businesses recover and also help banks grow. Meanwhile, the bank's capital is like a

primer to help businesses with orders to fulfill new contracts and maintain operations.
